

News Portal

Architecture:

1. 3 Tier Web API
2. SOLID implemented at least in DAL

Features:

1. User: Admin (Implement APIs for)
 - a. CRUD News
 - b. CRUD News categories
 - c. Get news by category (with posted by)
 - d. Get news by date (with posted by)
 - e. Get news by category of a specific date (with posted by)
 - f. Comment and reacts of news
2. User: User (Implement APIs for)
 - a. Get news (only news details)
 - b. Comment on news
 - c. React on news

Carefully read and brainstorm the scenario and implement the APIs. We will work on frontend application later.
